

# Help Dr Staroni Give Barty a Drip

Normally Barty the Blood Disorder Pixie has his factor infusion for his haemophilia in the morning to help make his blood clot. He likes to hold his Bravery Buddy when he does this.

Oh no! Poor Barty was playing at Pixie School today when he fell over and hurt his knee on a rock. Because it was swelling up, Tinker and Buzz, the paramedics came and took him in the flying ambulance to the Twisty Woo Hospital.

Dr Staroni is very kind. She fixed his knee and now she is giving him a blood transfusion. (He is happier now that he is wearing his favourite shark pyjamas.)

Help Dr Staroni care for Barty by giving him his blood transfusion.

Cut out Barty, and the drip stand and glue them in the right places on the picture. Then draw the tube from the bag to his arm.

He is feeling a bit scared about having the needle. He is holding his cuddly flying bunny toy to help him feel brave. What could you say to him to make him feel better?
